PREMIUM FEED SUPPLEMENTS

NT Distributor

## Animal Health & Nutrition

SweetPro products support animal digestive health and growth, while supporting excellent feed efficiency. A blend of distillers grains, vitamins and minerals, with beta-glucan, a prebiotic and proprietary blend additive ProBiotin. No molasses and no urea.

SweetPro products – in blocks and meal – are cost efficient, easy to handle and support nutrient utilization, giving animals what they need for growth, good health and reproduction.

## Cattle Horse Sheep Goats

**EQUILIX™**

**EQUIPRIDE™**

*“We know only too well, that the constant challenge for the North Australian pastoral industry, is the rebreed of the wet cow.*

*We know that this is a 3 part strategy: 1) Genetics 2) Nutrition 3) Management.*

*Sweetpro is here to assist with the critical criteria of nutrition—in a grass based operation.*

*After decades of using many and varied commercial and self-made supplement mixes but still not achieving the results we desired, we are excited to introduce a new and better option, SweetPro. It is a pro-biotic mineral, protein and energy block that is designed for optimal performance off grass. Unlike molasses and urea based products, animals actually consume less not more grass, and use that grass more effectively.*

*After using it for 12 months, we are pleased with the preliminary results—a 15% increase in total pregnancy rate, and a whopping 50% increase in wet cow rebreed. Plus an increase in body condition of the cows and more consistent and heavier weaners.*

*We are so confident in the results that we have taken on the distributorship of SweetPro for the NT. We welcome your enquiries at any time and the opportunity to tailor a program to suit your individual needs.*

*Kindest regards,*

*Moira, Mike, Clair  
and families ..*
